Use case 001: An actor who is not authenticated must be able to register as a user.

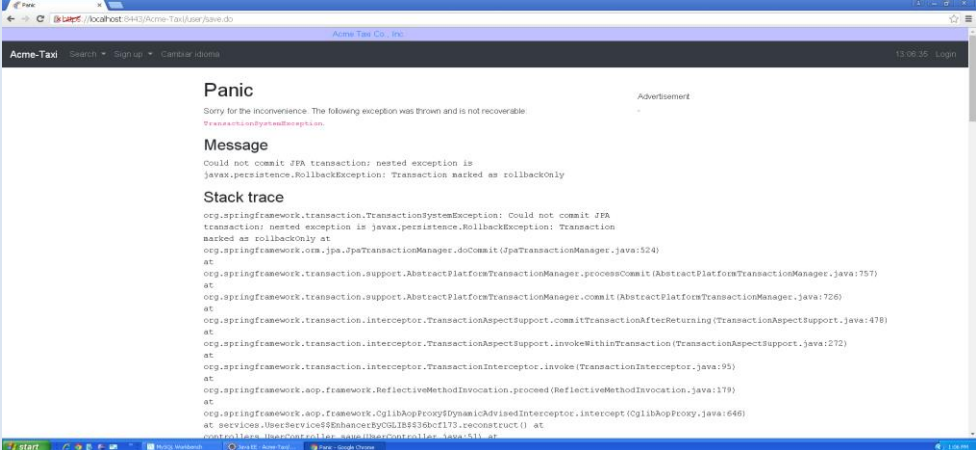

Description

An actor who is not authenticated wishes to register as a user.

Access

Main Menu > Sign up > Register as a user

Tests

Test 001	
Description	With the language set to “English”, the testers must go to the form and click on ‘Save’ with all the inputs in blank. After that, an alert regarding the phone number is shown. They must click on ‘Ok’.
Expected	The form will be shown again with error messages, giving information about the blank inputs.
Outcome	When saving without any parameter, a panic is shown 
Notes	

Test 002

Description

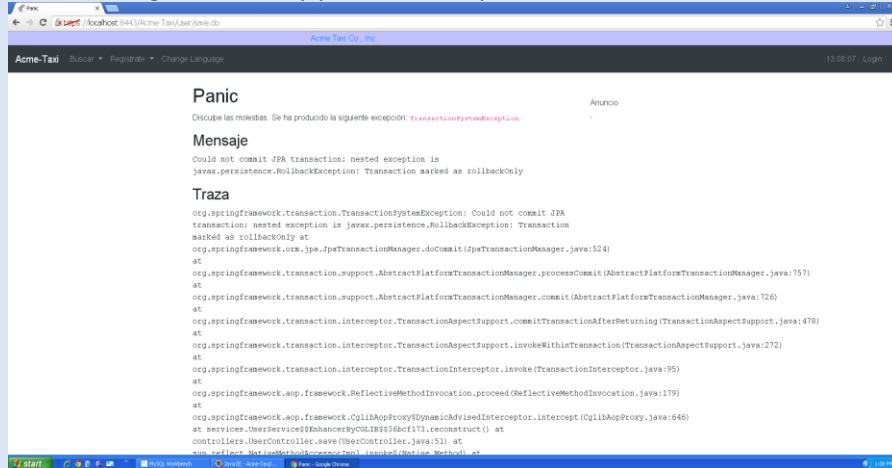

With the language set to “Spanish”, the testers must go to the form and click on ‘Enviar’ with all the inputs in blank. After that, an alert regarding the phone number is shown. They must click on ‘Ok’.

Expected

The form will be shown again with error messages, giving information about the blank inputs.

Outcome

When saving without any parameter, a panic is shown

Notes

Test 003

Description

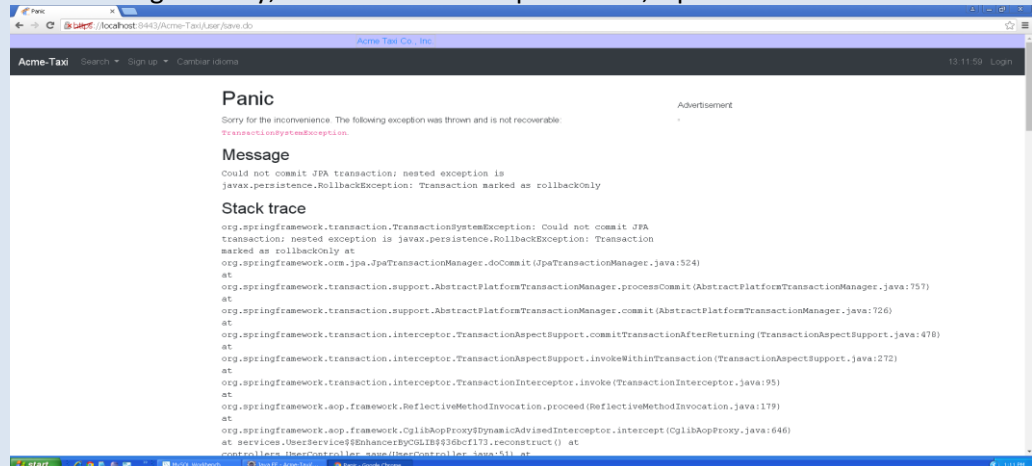

With the language set to “English”, the testers must go to the form and fill it, with the following data: **username:** “usertest”, **password:** “usertest”, **confirm password:** “usertest”, **name:** “<script>alert(‘Hacked’)</script>.”, **surname:** “usertest”, **email:** “user@test.com”, **phone:** “677123456”, **birthdate:** “09/01/1990” and **photo:** “https://statusandphoto.weebly.com/uploads/6/0/1/5/60158603/8347592_orig.png”. They must also accept the terms and conditions. Then, the testers will accept the terms and conditions and finally, they will click on ‘Save’.

Expected

The form will be shown again. An error message will inform about the insecure data.

Outcome

When saving this way, without “Location” parameter, a panic is shown

Notes

Test 004

Description

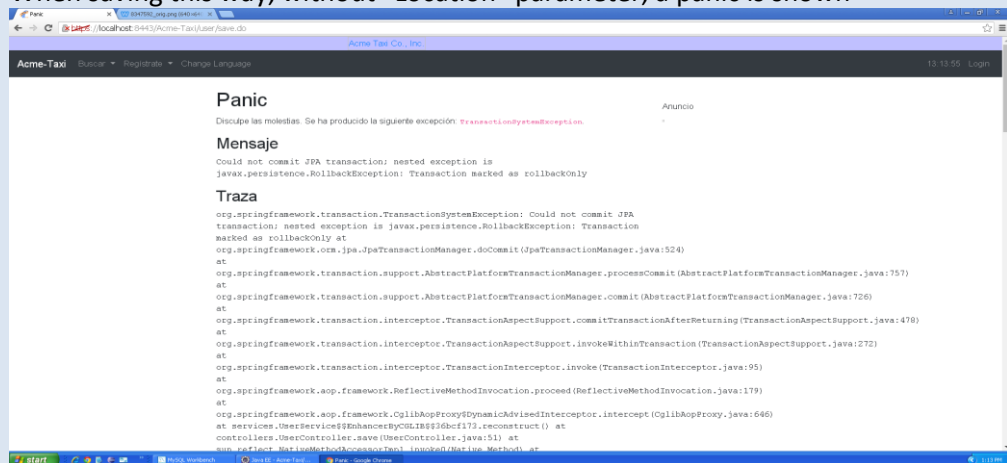

With the language set to “Spanish”, the testers must go to the form and fill it, with the following data: **usuario:** “usertestesp”, **contraseña:** “usertestesp”, **confirmar contraseña:** “usertestesp”, **nombre:** “<script>alert(‘Hacked’)</script>.”, **apellidos:** “usertestesp”, **email:** “user@test.com”, **teléfono:** “677123456”, **fecha de nacimiento:** “09/01/1990” and **foto:** “https://statusandphoto.weebly.com/uploads/6/0/1/5/60158603/8347592_orig.png”. They must also accept the terms and conditions. Then, the testers will accept the terms and conditions and finally, they will click on ‘Enviar’.

Expected

The form will be shown again. An error message will inform about the insecure data.

Outcome

When saving this way, without “Location” parameter, a panic is shown

Notes

Test 005

Description

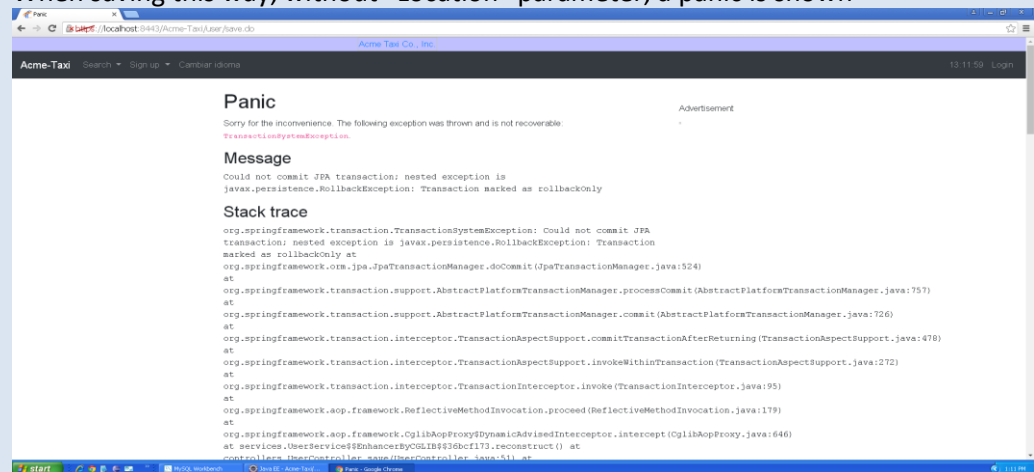

With the language set to “English”, the testers must go to the form and fill it, with the following data: **username:** “usertest”, **password:** “usertest”, **confirm password:** “usertest”, **name:** “usertest”, **surname:** “usertest”, **email:** “user@test.com”, **phone:** “677123456”, **birthdate:** “09/01/1990” and **photo:** “https://statusandphoto.weebly.com/uploads/6/0/1/5/60158603/8347592_orig.png”. Then, the testers will not accept the terms and conditions. Finally, they will click on ‘Save’.

Expected

The form will be shown again. The system will show the following error message: You must agree to the Terms and Conditions

Outcome

When saving this way, without “Location” parameter, a panic is shown

Notes

Test 006

Description

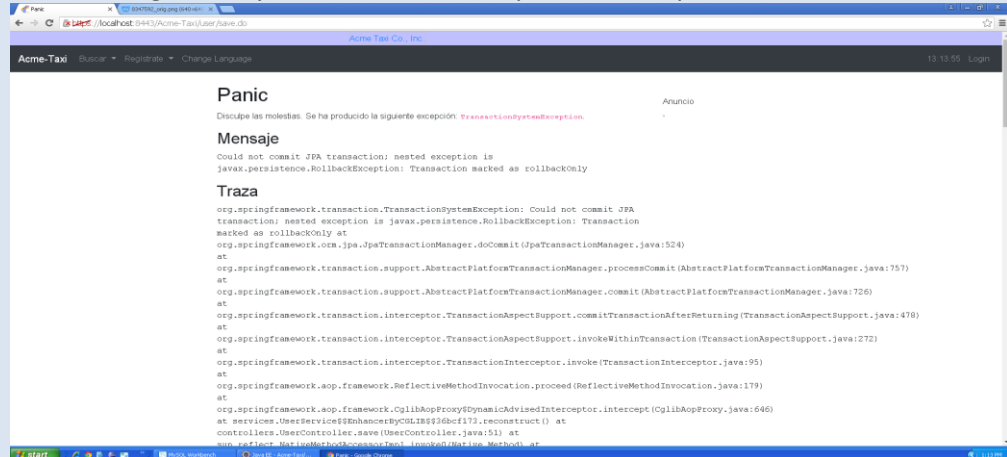

With the language set to “Spanish”, the testers must go to the form and fill it, with the following data: **usuario**: “usertestesp”, **contraseña**: “usertestesp”, **confirmar contraseña**: “usertestesp”, **nombre**: “usertestesp”, **apellidos**: “usertestesp”, **email**: “user@test.com”, **teléfono**: “677123456”, **fecha de nacimiento**: “09/01/1990 and **foto**:”https://statusandphoto.weebly.com/uploads/6/0/1/5/60158603/8347592_orig.png”. Then, the testers will not accept the terms and conditions and finally will click on ‘Enviar’.

Expected

The form will be opened again. The system will show the following error message: Debe aceptar los términos y condiciones de uso.

Outcome

When saving this way, without “Location” parameter, a panic is shown

Notes

Test 007

Description

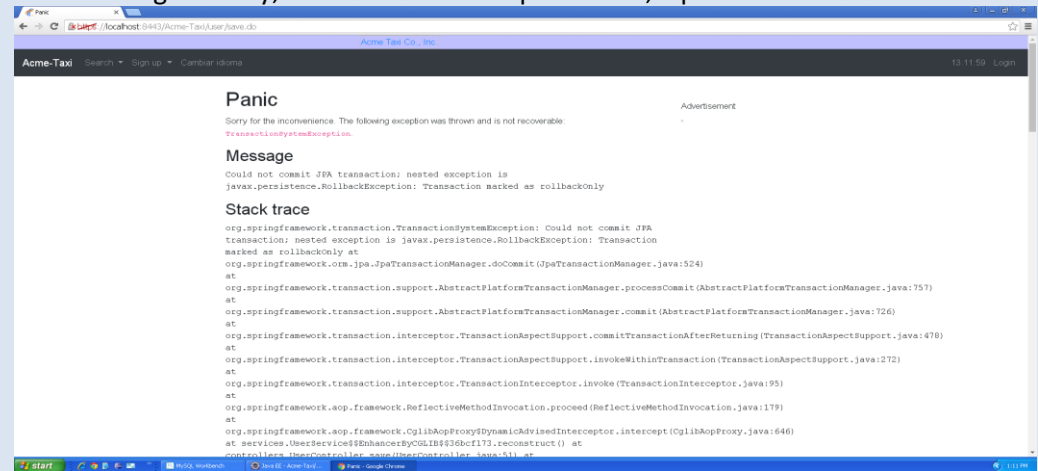

With the language set to “English”, the testers must go to the form and fill it, with the following data: **username: “mechtest”, password: “mechtest”, confirm password: “mechtest”, name: “mechtest”, surname: “mechtest”, email: “mech@test.com”, phone: “677123456”, birthdate: “09/01/2008” and photo: “https://statusandphoto.weebly.com/uploads/6/0/1/5/60158603/8347592_orig.png”**. They must also accept the terms and conditions. Then, the testers will accept the terms and conditions and finally, they will click on ‘Save’.

Expected

The form will be shown again. The system will show the following error message: You must be at least 18 to register to the site.

Outcome

When saving this way, without “Location” parameter, a panic is shown

Notes

Test 008

Description

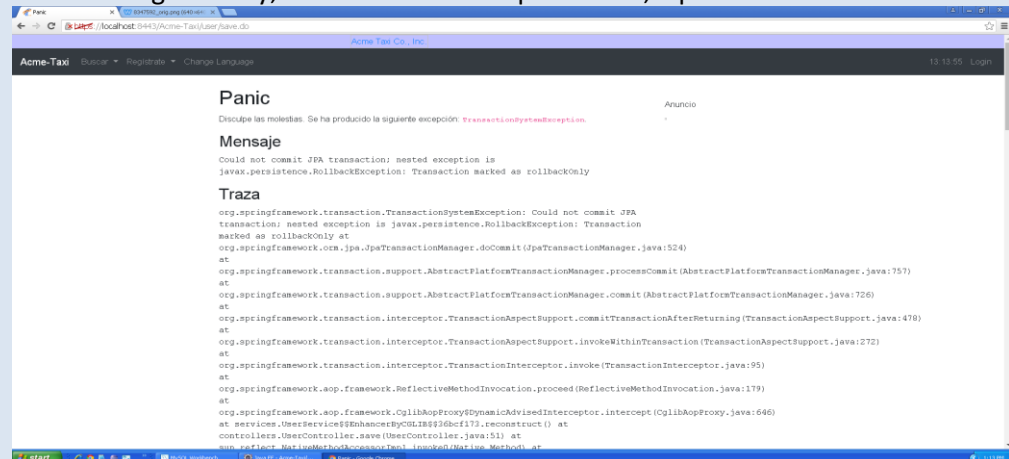

With the language set to “Spanish”, the testers must go to the form and fill it, with the following data: **usuario:** “usertestesp”, **contraseña:** “usertestesp”, **confirmar contraseña:** “usertestesp”, **nombre:** “usertestesp”, **apellidos:** “usertestesp”, **email:** “mech@test.com”, **teléfono:** “677123456”, **fecha de nacimiento:** “09/01/2008” and **foto:** “https://statusandphoto.weebly.com/uploads/6/0/1/5/60158603/8347592_orig.png”. They must also accept the terms and conditions. Then, the testers will accept the terms and conditions and finally, they will click on ‘Enviar’.

Expected

The form will be shown again. The system will show the following error message: Debe tener al menos 18 años para registrarse.

Outcome

When saving this way, without “Location” parameter, a panic is shown

Notes

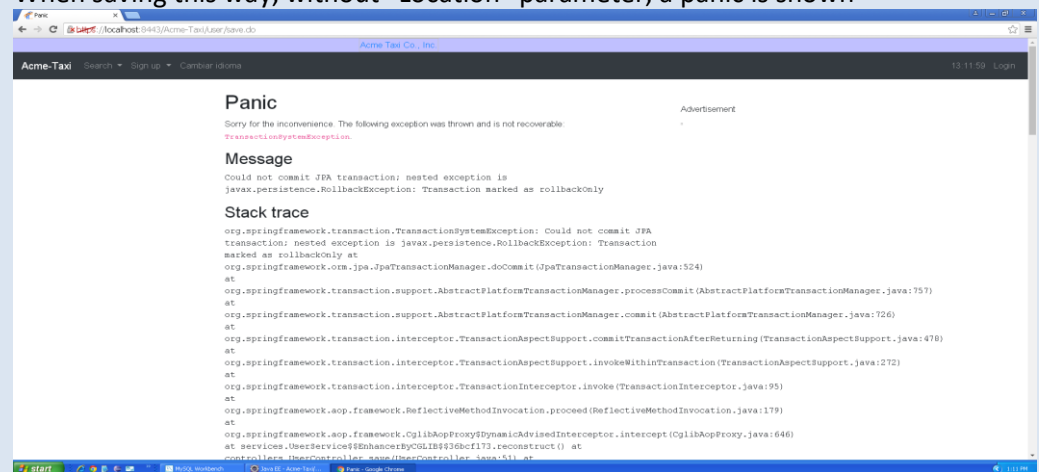

Test 009

Description

With the language set to “English”, the testers must go to the form and fill it, with the following data: **username:** “usertest”, **password:** “usertest”, **confirm password:** “usertest”, **name:** “usertest”, **surname:** “usertest”, **email:** “user@test.com”, **phone:** “677123456”, **birthdate:** “09/01/1990 and **photo:** “https://statusandphoto.weebly.com/uploads/6/0/1/5/60158603/8347592_orig.png”. They must also accept the terms and conditions. Then, the testers will accept the terms and conditions and finally, they will click on ‘Save’.

Expected Outcome

The main page will be shown. Then, if the testers try to log in, the system let them in. When saving this way, without “Location” parameter, a panic is shown

Notes

Test 010

Description

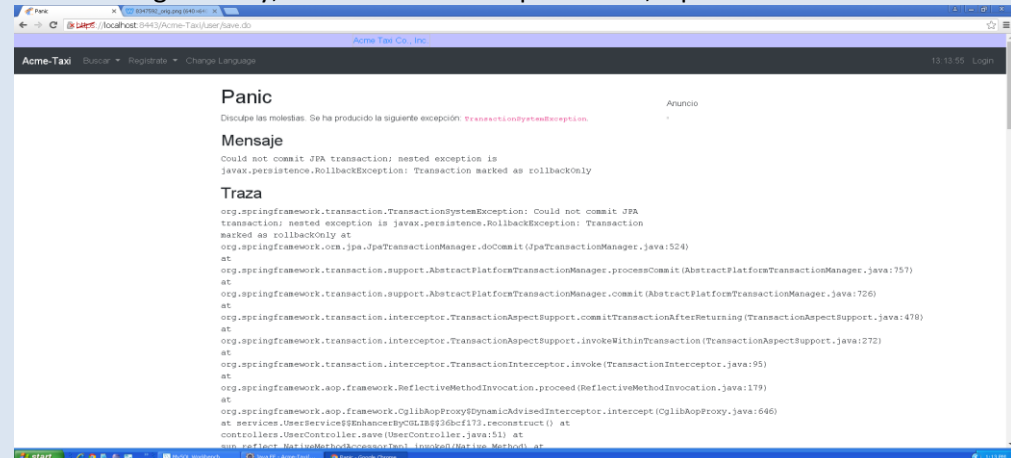

With the language set to “Spanish”, the testers must go to the form and fill it, with the following data: **usuario:** “usertestesp”, **contraseña:** “usertestesp”, **confirmar contraseña:** “usertestesp”, **nombre:** “usertestesp”, **apellidos:** “usertestesp”, **email:** “user@test.com”, **teléfono:** “677123456”, **fecha de nacimiento:** “09/01/1990 and **foto:** “https://statusandphoto.weebly.com/uploads/6/0/1/5/60158603/8347592_orig.png”. They must also accept the terms and conditions. Then, the testers will accept the terms and conditions and finally, they will click on ‘Enviar’.

Expected

The main page will be shown. Then, if the testers try to log in, the system let them in.

Outcome

When saving this way, without “Location” parameter, a panic is shown

Notes

Use case 002: An actor who is not authenticated must be able to register as a mechanic.

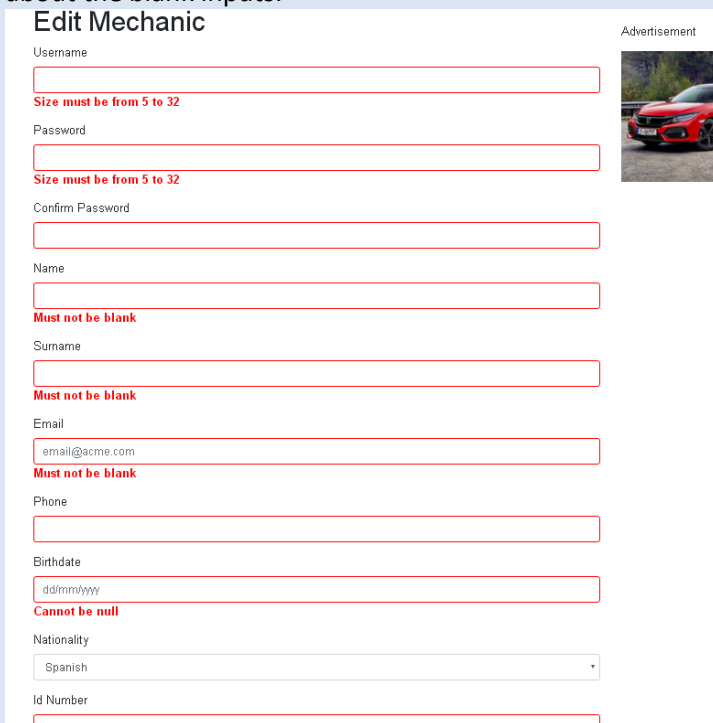

Description

An actor who is not authenticated wishes to register as a mechanic.

Access

Main Menu > Sign up > Register as a mechanic

Tests

Test 011	
Description	With the language set to “English”, the testers must go to the form and click on ‘Save’ with all the inputs in blank. After that, an alert regarding the phone number is shown. They must click on ‘Ok’.
Expected	<p>The form will be shown again with error messages, giving information about the blank inputs.</p>  <p>The screenshot shows a web form titled 'Edit Mechanic'. It contains several input fields with red error messages below them: 'Username' (Size must be from 5 to 32), 'Password' (Size must be from 5 to 32), 'Confirm Password' (empty), 'Name' (Must not be blank), 'Surname' (Must not be blank), 'Email' (email@acme.com, Must not be blank), 'Phone' (empty), 'Birthdate' (dd/mm/yyyy, Cannot be null), 'Nationality' (dropdown menu with 'Spanish' selected), and 'Id Number' (empty). An advertisement image of a red car is visible on the right side of the form.</p>
Outcome	Outcome is the same as expected.
Notes	

Test 012

Description	With the language set to "Spanish", the testers must go to the form and click on 'Enviar' with all the inputs in blank. After that, an alert regarding the phone number is shown. They must click on 'Ok'.
Expected	The form will be shown again with error messages, giving information about the blank inputs.
Outcome	Outcome is the same as expected.
Notes	

Test 013

Description	With the language set to "English", the testers must go to the form and fill it, with the following data: username: "mechtest", password: "mechtest", confirm password: "mechtest", name: "mechtest", surname: "mechtest", email: "mech@test.com", phone: "677123456", birthdate: "09/01/1990", identification number: "30262291L", nationality: "Spanish" and photo: "https://statusandphoto.weebly.com/uploads/6/0/1/5/60158603/8347592_orig.png". They must also accept the terms and conditions. Then, the testers will accept the terms and conditions and finally, they will click on 'Save'.

Origen

Destino

Enviar

Listar todos los anuncios

Outcome *Outcome was the same as expected.*

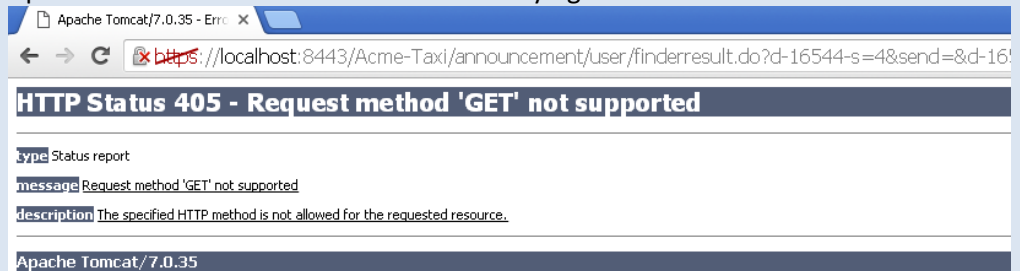

Notes

Test 282

Description With the language set to “Spanish”, the testers must repeat the test 281. Afterwards, they will test that the announcements can be sorted by title, price or moment.

Expected The system must return a list of announcements which are sorted by title, price or moment.

Outcome Apache HTTP error 405 was thrown when trying to sort the announcements

Notes

Test 283

Description With the language set to “Spanish”, the testers must repeat the test 281. Then, they will press the “Mostrar” button.

Expected More detailed data from that announcement is displayed.

Outcome Outcome was the same as expected.

Notes

Test 284	
Description	With the language set to “Spanish”, the testers must repeat the test 281. Afterwards, they will check the date formatting.
Expected	The system must return the dates using the following format: dd-MM-yyyy HH:mm.
Outcome	Outcome was the same as expected.
Notes	

Use case 041: Create or edit an announcement.

Description

An actor who is authenticated as a user wants to create or edit an announcement.

Access

(Logged in as a user, please refer to the test related to logging in for more information) Main menu>Announcements>Create announcement / Main menu>Announcements>My announcements>Edit.

Tests

Test 285	
Description	With the language set to “English”, the testers must check that every important field is present.
Expected	<p>The system must return the form with the following fields: title, origin, destination, price per person, moment, description, pets allowed, smoking allowed, total seats.</p> <div> <div>Edit announcement</div> <div> <div>Title</div> <input type="text"/> </div> <div> <div>Origin</div> <input type="text"/> </div> <div> <div>Destination</div> <input type="text"/> </div> <div> <div>Price per person</div> <input type="text" value="0.0"/> </div> <div> <div>Moment</div> <input type="text" value="dd/mm/yyyy hh:mm"/> </div> <div> <div>Description</div> <input type="text"/> </div> <div> <input type="checkbox"/> Pets allowed <input type="checkbox"/> Smoking allowed </div> <div> <div>Total seats</div> <input type="text" value="0"/> </div> <div> <input type="button" value="Save"/> <input type="button" value="Cancel"/> </div> </div>

Test 286	
Description	With the language set to “English”, the testers must leave the form blank and press the “Cancel” button.
Expected	The system must return to the created announcements list.
Outcome	<i>Outcome was the same as expected.</i>
Notes	

Test 287	
Description	With the language set to “English”, the testers must leave the form blank and press the “Save” button.
Expected	The system must return the form along error messages in the corresponding form fields.
Outcome	<i>Outcome was the same as expected.</i>
Notes	

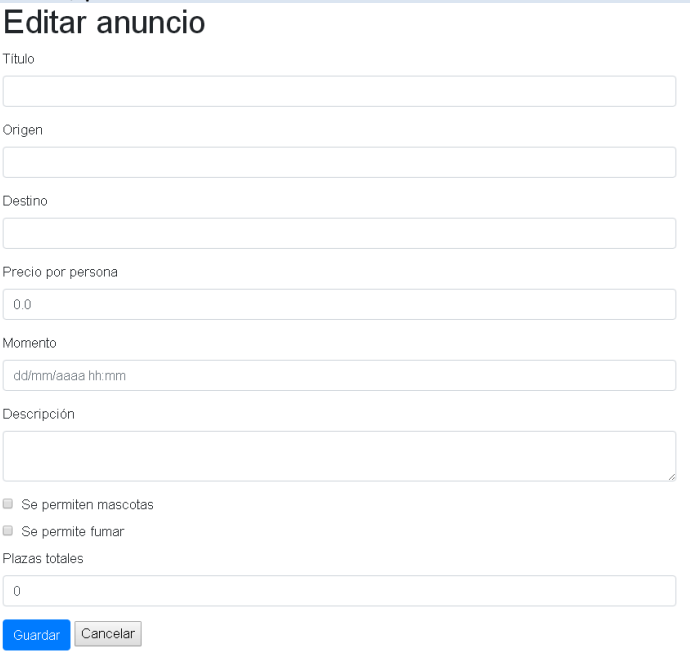

Test 288	
Description	With the language set to “English”, the testers must introduce an incorrect moment (a date with a wrong format or in the past) and press the “Save” button.
Expected	The system must return the form along the corresponding error message.
Outcome	<i>Outcome was the same as expected.</i>
Notes	

Test 289	
Description	With the language set to “English”, the testers must try to input any script in a form field, for example, “<script> alert(‘Hacked’) </script>”.
Expected	The system must return the form along an error message indicating that the introduced field is not allowed.
Outcome	<i>Outcome was the same as expected.</i>
Notes	

Test 290	
Description	With the language set to “English”, the testers must try to input any type of SQL injection in a form field, for example, “” or ‘A’ = ‘A’”.
Expected	The system must save the announcement with the corresponding field containing the same text that was introduced, that is, it was not executed.
Outcome	<i>Outcome was the same as expected.</i>
Notes	

Test 291	
Description	With the language set to “English”, the testers must check the hidden form fields.
Expected	The system must only show the hidden fields for the ID and the version.
Outcome	<i>Outcome was the same as expected.</i>
Notes	

Test 292	
Description	With the language set to “English”, the testers must input in the form any combination of correct data. Afterwards, the “Save” button must be pressed.
Expected	The system must return the list of created announcements.
Outcome	<i>Outcome was the same as expected.</i>
Notes	

Test 293	
Description	With the language set to “Spanish”, the testers must check that every important field is present.
Expected	<p>The system must return the form with the following fields: título, origen, destino, precio por persona, momento, descripción, se permiten mascotas, se permite fumar, plazas totales.</p> 
Outcome	<i>Outcome was the same as expected.</i>
Notes	

Test 294	
Description	With the language set to “Spanish”, the testers must leave the form blank and press the “Cancelar” button.
Expected	The system must return to the created announcements list.
Outcome	<i>Outcome was the same as expected.</i>
Notes	

Test 295	
Description	With the language set to “Spanish”, the testers must leave the form blank and press the “Guardar” button.
Expected	The system must return the form along error messages in the corresponding form fields.
Outcome	<i>Outcome was the same as expected.</i>

Notes	
-------	--

Test 296	
Description	With the language set to “English”, the testers must introduce an incorrect moment (a date with a wrong format or in the past) and press the “Guardar” button.
Expected	The system must return the form along the corresponding error message.
Outcome	<i>Outcome was the same as expected.</i>
Notes	

Test 297	
Description	With the language set to “Spanish”, the testers must try to input any script in a form field, for example, “<script> alert(‘Hacked’) </script>”.
Expected	The system must return the form along an error message indicating that the introduced field is not allowed
Outcome	<i>Outcome was the same as expected.</i>
Notes	

Test 298	
Description	With the language set to “Spanish”, the testers must try to input any type of SQL injection in a form field, for example, “” or ‘A’ = ‘A’”.
Expected	The system must save the announcement with the corresponding field containing the same text that was introduced, that is, it was not executed.
Outcome	<i>Outcome was the same as expected.</i>
Notes	

Test 299	
Description	With the language set to “Spanish”, the testers must check the hidden form fields.
Expected	The system must only show the hidden fields for the ID and the version
Outcome	<i>Outcome was the same as expected.</i>
Notes	

Test 300	
Description	With the language set to “Spanish”, the testers must input in the form any combination of correct data. Afterwards, the “Guardar” button must be pressed.
Expected	The system must return the list of created announcements.
Outcome	<i>Outcome was the same as expected.</i>
Notes	

Use case 042: Join an announcement.

Description

An actor who is authenticated as a user wants to join an announcement.

Access

(Logged in as a user, please refer to the test related to logging in for more information) Main menu>Announcements>Available announcements.

Tests

Test 301	
Description	With the language set to “English”, the testers must join an available and joinable announcement, that is, press the “Display” button and then the “Join” button if it is present.
Expected	The system must return the list of joined announcements and the joined announcement must be present.
Outcome	<i>Outcome was the same as expected.</i>
Notes	

Test 302	
Description	With the language set to “Spanish”, the testers must join an available and joinable announcement, that is, press the “Mostrar” button and then the “Unirse” button if it is present.
Expected	The system must return the list of joined announcements and the joined announcement must be present.
Outcome	<i>Outcome was the same as expected.</i>
Notes	

Use case 043: Drop out from an announcement.

Description

An actor who is authenticated as a user wants to drop out from an announcement.

Access

(Logged in as a user, please refer to the test related to logging in for more information) Main menu>Announcements>Joined announcements.

Tests

Test 303	
Description	With the language set to “English”, the testers must press the “Drop out” button.
Expected	The system must return the list of joined announcements and the selected announcement must not be present.
Outcome	<i>Outcome was the same as expected.</i>
Notes	

Test 304	
Description	With the language set to “Spanish”, the testers must press the “No asistir” button.
Expected	The system must return the list of joined announcements and the selected announcement must not be present.
Outcome	<i>Outcome was the same as expected.</i>
Notes	

Use case 044: Delete an announcement.

Description

An actor who is authenticated as a user wants to delete an announcement.

Access

(Logged in as a user, please refer to the test related to logging in for more information) Main menu>Announcements>My announcements>Edit.

Tests

Test 305	
Description	With the language set to “English”, the testers must press the “Delete” button.
Expected	The system must return the list of created announcements and the deleted announcement must not be present.
Outcome	<i>Outcome was the same as expected.</i>
Notes	

Test 306	
Description	With the language set to “Spanish”, the testers must press the “Borrar” button.
Expected	The system must return the list of joined announcements and the deleted announcement must not be present.
Outcome	<i>Outcome was the same as expected.</i>
Notes	

Use case 045: Delete announcement (admin).

Description

An actor who is authenticated as the admin wants to delete an announcement.

Access

(Logged in as the admin, please refer to the test related to logging in for more information) Main menu>Admin actions>List of announcements>Display.

Tests

Test 307	
Description	With the language set to “English”, the testers must press the “Delete” button.

Expected	The system must return the list of announcements and the deleted announcement must not be present. The creator and every attendant should receive a notification.
Outcome	<i>Outcome was the same as expected.</i>
Notes	

Test 308	
Description	With the language set to “Spanish”, the testers must press the “Borrar” button.
Expected	The system must return the list of announcements and the deleted announcement must not be present. The creator and every attendant should receive a notification.
Outcome	<i>Outcome was the same as expected.</i>
Notes	

Use case 046: Display an announcement.

Description

An actor who is authenticated or not wants to see an announcement with more details.

Access

(Optionally logged in as any actor, please refer to the test related to logging in for more information)
Main menu>Search>Search announcements>List all announcements>Display.

Tests

Test 309	
Description	With the language set to “English”, the testers must display any announcement.
Expected	The system must return the selected message, with the following fields: title, description (optional), creator, origin, destination, price per person, moment (with the following format: yyyy/MM/dd HH:mm), pets allowed, smoking allowed, cancelled, total seats, remaining seats, attendants, marked (only if logged in as the admin), comments.

Use case 047: An actor who is not authenticated cannot be able to list their folders.

Description

An unauthenticated actor wishes to list folders.

Access

<https://www.acme.com/folder/actor/list.do>

Tests

Test 311	
Description	With the language set to “English”, the testers must access to the given URL.
Expected	The system must show the login page.
Outcome	<i>Outcome as expected</i>
Notes	

Test 312	
Description	With the language set to “Spanish”, the testers must access to the given URL.
Expected	The system must show the login page.
Outcome	<i>Outcome as expected</i>
Notes	

Access

<https://www.acme.com/folder/actor/list.do?parentId=260>

Tests

Test 313	
Description	With the language set to “English”, the testers must access to the given URL.
Expected	The system must show the login page.
Outcome	<i>Outcome as expected</i>
Notes	

Test 314	
Description	With the language set to “Spanish”, the testers must access to the given URL.
Expected	The system must show the login page.
Outcome	<i>Outcome as expected</i>
Notes	

Use case 048: An actor who is authenticated must be able to manage his or her folders, except for the system folders.

Description

An authenticated actor wishes to list, edit, move or delete his or her folders.

Access

(Logged as “user1”, please refer to the test related to logging in as user for more information)

Main menu > Messaging service.

Tests

2017/02/24 23:05	admin	message5	Display message	Delete	Move to another folder		Mark as spam																																										
Outcome	Outcome as expected																																																
Notes																																																	

Test 338	
Description	With the language set to “English”, the testers must repeat the test 337. Afterwards, they will test that the pagination works correctly by clicking on the different buttons that are above the listing.
Expected	The system must return different pages of the listing, which display up to 5 articles different from the ones in another page.

Outcome	Outcome as expected
Notes	

Test 339	
Description	With the language set to “English”, the testers must repeat the test 337. Afterwards, they will test that the messages can be sorted by date or by sender.
Expected	The system must return a list of messages which are sorted by date or by sender.
Outcome	Outcome as expected
Notes	

Test 340	
Description	With the language set to “English”, the testers must repeat the test 337. Then, they will go to the last page of a list and delete every record in that page.
Expected	The system must return to another page and list its corresponding messages.
Outcome	Outcome as expected
Notes	Every time you delete a message you got redirected to first page.

Test 341	
Description	With the language set to “English”, the testers must repeat the test 337. Then, they will press the “Display message” button.
Expected	More detailed data from that message is displayed.
Outcome	Outcome as expected
Notes	

Test 342	
Description	With the language set to “English”, the testers must repeat the test 337. Then, they will press the “Move to another folder” button.
Expected	The form that will be used to move a message from one folder to another is displayed.
Outcome	<i>Outcome as expected</i>
Notes	

Test 343	
Description	With the language set to “English”, the testers must repeat the test 337. Then, they will press the “Mark as read” button.
Expected	The system must return the list of messages, with the selected message marked as read.
Outcome	<i>Outcome as expected</i>
Notes	

Test 344	
Description	With the language set to “English”, the testers must repeat the test 337. Then, they will press the “Mark as spam” button.
Expected	The system must return the list of messages, and the marked message should not appear. It should be in the Spam box, and automatically marked as read.
Outcome	<i>Outcome as expected</i>
Notes	

Test 345	
Description	With the language set to “English”, the testers must repeat the test 337. Afterwards, they will press the “Create a message” button.
Expected	The system must return the form used to create a new message.
Outcome	Outcome as expected
Notes	

Test 346	
Description	With the language set to “English”, the testers must repeat the test 337, logging in as the administrator. Then, they will press the “Broadcast a message” button.
Expected	The system must return the form used to broadcast a new message.
Outcome	Outcome as expected
Notes	

Test 347	
Description	With the language set to “English”, the testers must repeat the test 337. Afterwards, they will check the date formatting.
Expected	The system must return the dates using the following format: yyyy/MM/dd HH:mm.
Outcome	Outcome as expected
Notes	

Test 348																																																							
Description	With the language set to “Spanish”, the testers must press the “Ver mensajes” button that can be found in a folder that contains messages.																																																						
Expected	<div><p>The system must return a list containing the messages in that folder. Outcome	Outcome as expected																																																						
Notes																																																							

Test 349	
Description	With the language set to “Spanish”, the testers must repeat the test 348. Afterwards, they will test that the pagination works correctly by clicking on the different buttons that are above the listing
Expected	The system must return different pages of the listing, which display up to 5 articles different from the ones in another page.
Outcome	Outcome as expected
Notes	

Test 350	
Description	With the language set to “Spanish”, the testers must repeat the test 348. Afterwards, they will test that the messages can be sorted by date or by sender.
Expected	The system must return a list of messages which are sorted by date or by sender.
Outcome	Outcome as expected
Notes	

Test 351	
Description	With the language set to “Spanish”, the testers must repeat the test 348. Then, they will go to the last page of a list and delete every record in that page.
Expected	The system must return to another page and list its corresponding messages.
Outcome	Outcome as expected
Notes	

Test 352	
Description	With the language set to “Spanish”, the testers must repeat the test 348. Then, they will press the “Mostrar mensaje” button.
Expected	More detailed data from that message is displayed.
Outcome	Outcome as expected
Notes	

Test 353	
Description	With the language set to “Spanish”, the testers must repeat the test 348. Then, they will press the “Mover a otra carpeta” button.
Expected	The form that will be used to move a message from one folder to another is displayed.
Outcome	<i>Outcome as expected</i>
Notes	

Test 354	
Description	With the language set to “Spanish”, the testers must repeat the test 348. Then, they will press the “Marcar como leído” button.
Expected	The system must return the list of messages, with the selected message marked as read.
Outcome	<i>Outcome as expected</i>
Notes	

Test 355	
Description	With the language set to “Spanish”, the testers must repeat the test 348. Then, they will press the “Marcar como spam” button.
Expected	The system must return the list of messages, and the marked message should not appear. It should be in the Spam box, and automatically marked as read.
Outcome	<i>Outcome as expected</i>
Notes	

Test 356	
Description	With the language set to “Spanish”, the testers must repeat the test 348. Afterwards, they will press the “Crear un mensaje” button.
Expected	The system must return the form used to create a new message.
Outcome	Outcome as expected
Notes	

Test 357	
Description	With the language set to “Spanish”, the testers must repeat the test 348, logging in as the administrator. Then, they will press the “Difundir mensaje” button.
Expected	The system must return the form used to broadcast a new message.
Outcome	Outcome as expected
Notes	

Test 358	
Description	With the language set to “Spanish”, the testers must repeat the test 348. Afterwards, they will check the date formatting.
Expected	The system must return the dates using the following format: dd-MM-yyyy HH:mm.
Outcome	Outcome as expected
Notes	

Use case 050: Create a new message.

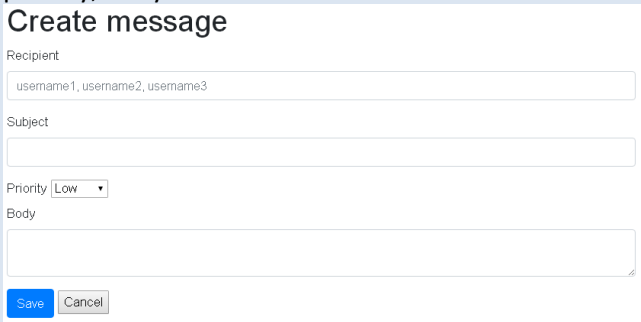

Description

An actor who is authenticated wants to create a new message.

Access

(Logged in as any actor, please refer to the test related to logging in for more information) Main menu>Folders and messaging>Send message (Mandar mensaje).

Tests

Test 359	
Description	With the language set to “English”, the testers must check that every important field is present.
Expected	<p>The system must return the form with the following fields: recipient, subject, priority, body.</p> <p>Create message</p> 
Outcome	<i>Outcome as expected</i>
Notes	

Test 360	
Description	With the language set to “English”, the testers must leave the form in blank and press the “Cancel” button.
Expected	The system must return to the folder list.
Outcome	<i>Outcome as expected</i>
Notes	

Test 370	
Description	With the language set to “English”, the testers must leave the form in blank and press the “Save” button.
Expected	The system must return the form along error messages in the form fields that must not be left blank or empty.
Outcome	<i>Outcome as expected</i>
Notes	

Test 371	
Description	With the language set to “English”, the testers must try to input any script in a form field, for example, “<script> alert(‘Hacked’) </script>”.
Expected	The system must return the form along an error message indicating that the introduced field is not allowed
Outcome	<i>Outcome as expected</i>
Notes	The recipients field does not need to return the error message.

Test 372	
Description	With the language set to “English”, the testers must try to input any type of SQL injection in a form field, for example, “” or ‘A’ = ‘A’”.
Expected	The system must send the message with the corresponding field containing the same text that was introduced, that is, it was not executed.
Outcome	<i>Error. Message sent.</i>
Notes	

Test 373	
Description	With the language set to “English”, the testers must check that every possible value for the priority is available.
Expected	The system must return the following possible values: low, neutral, high. Any of them must work well.
Outcome	<i>Outcome as expected</i>
Notes	

Test 374	
Description	With the language set to “English”, the testers must check the hidden form fields.
Expected	The system must not display any hidden field.
Outcome	<i>Outcome as expected</i>
Notes	

Test 375	
Description	With the language set to “English”, the testers must input in the form any combination of correct data, without taboo words. Afterwards, the “Save” button must be pressed.
Expected	The system must return a list of messages, corresponding to the out box of the logged in actor, and it must contain the newly created message. The message should be available each recipient’s in box.
Outcome	<i>Outcome as expected</i>
Notes	

Test 376	
Description	With the language set to “English”, the testers must input in the form any combination of correct data, containing any taboo word in the subject or the body. Afterwards, the “Save” button must be pressed.
Expected	The system must return a list of messages, corresponding to the out box of the logged in user, and it must contain the newly created message. The message should be available each recipient’s spam box.
Outcome	<i>Outcome as expected</i>
Notes	

Test 377	
Description	With the language set to “Spanish”, the testers must check that every important field is present.
Expected	<p>The system must return the form with the following fields: destinatario, asunto, prioridad, cuerpo.</p> 
Outcome	<i>Outcome as expected</i>
Notes	

Test 378	
Description	With the language set to “Spanish”, the testers must leave the form in blank and press the “Cancelar” button.
Expected	The system must return to the folder list.
Outcome	<i>Outcome as expected</i>
Notes	

Test 379	
Description	With the language set to “Spanish”, the testers must leave the form in blank and press the “Guardar” button.
Expected	The system must return the form along error messages in the form fields that must not be left blank or empty.
Outcome	<i>Outcome as expected</i>
Notes	

Test 380	
Description	With the language set to “Spanish”, the testers must try to input any script in a form field, for example, “<script> alert(‘Hacked’) </script>”.
Expected	The system must return the form along an error message indicating that the introduced field is not allowed
Outcome	<i>Outcome as expected</i>
Notes	The recipients field does not need to return the error message.

Test 381	
Description	With the language set to “Spanish”, the testers must try to input any type of SQL injection in a form field, for example, “” or ‘A’ = ‘A’”.
Expected	The system must send the message with the corresponding field containing the same text that was introduced, that is, it was not executed.
Outcome	<i>Outcome as expected</i>
Notes	

Test 382	
Description	With the language set to “Spanish”, the testers must check that every possible value for the priority is available.
Expected	The system must return the following possible values: baja, neutra, alta. Any of them must work well.
Outcome	<i>Outcome as expected</i>
Notes	

Test 383	
Description	With the language set to “Spanish”, the testers must check the hidden form fields.
Expected	The system must not display any hidden field.
Outcome	<i>Outcome as expected</i>
Notes	

Test384	
Description	With the language set to “Spanish”, the testers must input in the form any combination of correct data, without taboo words. Afterwards, the “Guardar” button must be pressed.
Expected	The system must return a list of messages, corresponding to the out box of the logged in actor, and it must contain the newly created message. The message should be available each recipient’s in box.
Outcome	<i>Outcome as expected</i>
Notes	

Test 385	
Description	With the language set to “Spanish”, the testers must input in the form any combination of correct data, containing any taboo word in the subject or the body. Afterwards, the “Guardar” button must be pressed.
Expected	The system must return a list of messages, corresponding to the out box of the logged in user, and it must contain the newly created message. The message should be available each recipient’s spam box.
Outcome	<i>Outcome as expected</i>
Notes	

Use case 051: Broadcast a new message.

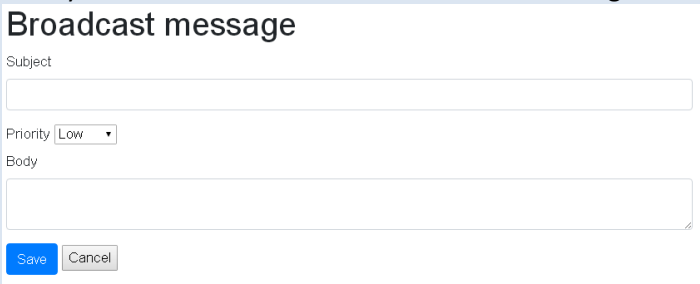

Description

The admin wants to broadcast a new message, that is, send a notification to every actor.

Access

(Logged in as the admin, please refer to the test related to logging in for more information) Main menu>Folders and messaging>Broadcast message (Difundir mensaje).

Tests

Test 386	
Description	With the language set to “English”, the testers must check that every important field is present.
Expected	<p>The system must return the form with the following fields: subject, priority, body.</p>

Outcome	<i>Outcome as expected</i>
Notes	

Test 398	
Description	With the language set to “Spanish”, the testers must try to input any type of SQL injection in a form field, for example, “” or ‘A’ = ‘A’”.
Expected	The system must send the message with the corresponding field containing the same text that was introduced, that is, it was not executed.
Outcome	<p><i>Error. No error shown:</i></p> <div> <h2>Mostrar mensaje</h2> <p>Remitente: admin</p> <p>Asunto: ' or 'A' = 'A'</p> <p>Momento: 04-06-2018 01:07</p> <p>Prioridad: Baja</p> <p>Cuerpo: asdfasfd</p> </div>
Notes	

Test 399	
Description	With the language set to “Spanish”, the testers must check that every possible value for the priority is available.
Expected	The system must return the following possible values: baja, neutra, alta. Any of them must work well.
Outcome	<i>Outcome as expected</i>
Notes	

Test 400	
Description	With the language set to “Spanish”, the testers must check the hidden form fields.
Expected	The system must only display the hidden fields corresponding to the ID and the version.
Outcome	<i>Outcome as expected</i>
Notes	

Test 401	
Description	With the language set to “Spanish”, the testers must input in the form any combination of correct data. Afterwards, the “Guardar” button must be pressed.
Expected	The system must return a list of messages, corresponding to the out box of the admin, and it must contain the newly created message. The message should be available each recipient’s notification box.
Outcome	<i>Outcome as expected</i>
Notes	

Use case 052: Delete a message.

Description

An actor who is authenticated wants to delete a message.

Access

(Logged in as any actor, please refer to the test related to logging in for more information) Main menu>Folders and messaging>See messages.

Tests

Test 402	
Description	With the language set to “English”, the testers must delete a message from any folder but the trash box.
Expected	The system must return to the message list of the same folder, and the deleted message must be in the trash box.
Outcome	<i>Outcome as expected</i>
Notes	

Test 403	
Description	With the language set to “English”, the testers must delete a message from the trash box.
Expected	The system must return to the message list of the trash box, and the deleted message must not be present.

Outcome	<i>Outcome as expected</i>
Notes	

Test 404	
Description	With the language set to “Spanish”, the testers must delete a message from any folder but the trash box.
Expected	The system must return to the message list of the same folder, and the deleted message must be in the trash box.
Outcome	<i>Outcome as expected</i>
Notes	

Test 405	
Description	With the language set to “Spanish”, the testers must delete a message from the trash box.
Expected	The system must return to the message list of the trash box, and the deleted message must not be present.
Outcome	<i>Outcome as expected</i>
Notes	

Use case 053: Move a message.

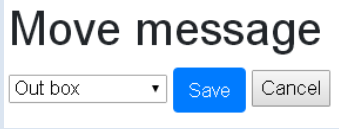

Description

An actor who is authenticated wants to move a message from one folder to another.

Access

(Logged in as any actor, please refer to the test related to logging in for more information) Main menu>Folders and messaging>See messages>Move to another folder (Mover a otra carpeta).

Tests

Test 406	
Description	With the language set to “English”, the testers must check that every important field is present.
Expected	The system must return the form with the field containing the different folders that the logged in actor has. 
Outcome	<i>Outcome as expected</i>
Notes	

Test 407	
Description	With the language set to “English”, the testers must press the “Cancel” button.

Expected	The system must return to the message list.
Outcome	<i>Outcome as expected</i>
Notes	

Test 408	
Description	With the language set to “English”, the testers must check that every correct value for the target folder is available.
Expected	The system must return every folder that the actor has, except for the origin folder.
Outcome	<i>Error. There are missing folders. (Example: 'Spambox')</i>
Notes	

Test 409	
Description	With the language set to “English”, the testers must choose any folder. Afterwards, the “Save” button must be pressed.
Expected	The system must return a list of messages, corresponding to the target folder, and it must contain the moved message. The message must not be present in the origin folder.
Outcome	<i>Outcome as expected</i>
Notes	

Test 410	
Description	With the language set to “Spanish”, the testers must check that every important field is present.
Expected	The system must return the form with the field containing the different folders that the logged in actor has. 
Outcome	<i>Outcome as expected</i>
Notes	

Test 411	
Description	With the language set to “Spanish”, the testers must press the “Cancelar” button.
Expected	The system must return to the message list.
Outcome	<i>Outcome as expected</i>
Notes	

Test 412	
Description	With the language set to “Spanish”, the testers must check that every correct value for the target folder is available.
Expected	The system must return every folder that the actor has, except for the origin folder.

Outcome	<i>Error. There are missing folders (Example: 'Spambox')</i>
Notes	

Test 413	
Description	With the language set to “Spanish”, the testers must choose any folder. Afterwards, the “Guardar” button must be pressed.
Expected	The system must return a list of messages, corresponding to the target folder, and it must contain the moved message. The message must not be present in the origin folder.
Outcome	<i>Outcome as expected</i>
Notes	

Use case 054: Display a message.

Description

An actor who is authenticated wants to see a message with more details.

Access

(Logged in as any actor, please refer to the test related to logging in for more information) Main menu>Folders and messaging>See messages>Display message (Mostrar mensaje).

Tests

Test 414	
Description	With the language set to “English”, the testers must display any message.
Expected	<p>The system must return the selected message, with the following fields: sender, subject, moment (with the following format: yyyy/MM/dd HH:mm), priority, body.</p> <div> <h4>Display message</h4> <p>Sender: admin</p> <p>Subject: message1</p> <p>Moment: 2017/02/24 23:00</p> <p>Priority: Low</p> <p>Body: bodymessage1</p> <p>Delete Move to another folder</p> </div>
Outcome	<i>Outcome as expected</i>
Notes
