Description	With the language set to "Spanish", testers will repeat the previous test, but
	this time, they will submit the following data:
	Texto: "test"
	Afterwards, they will press the button "Send"
Expected	The user will be redirected to the announcement from where he came from.
	The new comment must appear at the end of the page.
Outcome	
Notes	

Use case 018: Deleting a comment.

Description

An admin wants to delete one comment.

Access

(Logged as an admin) Main Menu > Search -> Search Announcement

Test 100	
Description	With the language set to "English" and logged as "admin", testers will
	access the tool for searching announcements. Then, they will search for the
	announcement: "announcement1" and display it (Please, refer to the test
	of searching and displaying announcements if you need further assistance).
	This announcement will show one comment with two replies associated to

```
it. Click the link "Delete comment".
                   Comments
                    user1 (2017/07/29 12:30) :
                    comment1
                     user2 (2017/07/29 17:30) :
                      Delete Reply
                      user3 (2017/07/29 18:30):
                       reply2
                    Delete Reply
                   This Comment Has Replies. Please, delete them first.
Expected
                  The system will show the same announcement again, but the comment
                  hasn't been deleted and there will be a new error message with the text:
                  "This comment has replies. Please, delete them first"
Outcome
Notes
```

Test 101	
Description	Repeat the previous test, but this time, click the link "Delete Reply" in the two replies.
Expected	The system will show the same announcement again, but this time the replies aren't there anymore.
Outcome	
Notes	

Test 102	
Description	Repeat the previous test, but this time, click the link "Delete Comment" in
	the comment.
Expected	The system will show the same announcement again, but this time there
	are not any comments or replies.
Outcome	
Notes

Test 338	
Description	With the language set to "English", the testers must repeat the test 337. Afterwards, they will test that the pagination works correctly by clicking on the different buttons that are above the listing.
Expected	The system must return different pages of the listing, which display up to 5 articles different from the ones in another page.

Outcome
Notes

Test 339	
Description	With the language set to "English", the testers must repeat the test 337.
	Afterwards, they will test that the messages can be sorted by date or by sender.
Expected	The system must return a list of messages which are sorted by date or by sender.
Outcome	
Notes	

Test 340	
Description	With the language set to "English", the testers must repeat the test 337. Then,
	they will go to the last page of a list and delete every record in that page.
Expected	The system must return to another page and list its corresponding messages.
Outcome	
Notes	

Test 341	
Description	With the language set to "English", the testers must repeat the test 337. Then,
	they will press the "Display message" button.
Expected	More detailed data from that message is displayed.
Outcome	
Notes	

Test 342	
Description	With the language set to "English", the testers must repeat the test 337. Then, they will press the "Move to another folder" button.
Expected	The form that will be used to move a message from one folder to another is displayed.
Outcome	
Notes	

Test 343	
Description	With the language set to "English", the testers must repeat the test 337. Then, they will press the "Mark as read" button.
Expected	The system must return the list of messages, with the selected message marked as read.
Outcome	
Notes	

Test 344	
Description	With the language set to "English", the testers must repeat the test 337. Then,
	they will press the "Mark as spam" button.
Expected	The system must return the list of messages, and the marked message should not
	appear. It should be in the Spam box, and automatically marked as read.
Outcome	
Notes	

Test 345	
Description	With the language set to "English", the testers must repeat the test 337.
	Afterwards, they will press the "Create a message" button.
Expected	The system must return the form used to create a new message.
Outcome	
Notes	

Test 346	
Description	With the language set to "English", the testers must repeat the test 337, logging in as the administrator. Then, they will press the "Broadcast a message" button.
Expected	The system must return the form used to broadcast a new message.
Outcome	
Notes	

Test 347	
Description	With the language set to "English", the testers must repeat the test 337. Afterwards, they will check the date formatting.
Expected	The system must return the dates using the following format: yyyy/MM/dd
	HH:mm.
Outcome	
Notes	

Test 348							
Description		With the language set to "Spanish", the testers must press the "Ver mensajes" button that can be found in a folder that contains messages.					
Expected	The system must return a list containing the messages in that folder. The relevant data from each message is displayed. Lista de mensajes

Expected	The system must return a list of messages, corresponding to the out box of the admin, and it must contain the newly created message. The message should be available each recipient's notification box.	
Outcome		
Notes		

Use case 052: Delete a message.

Description

An actor who is authenticated wants to delete a message.

Access

(Logged in as any actor, please refer to the test related to logging in for more information) Main menu>Folders and messaging>See messages.

Test 402	
Description	With the language set to "English", the testers must delete a message from any folder but the trash box.
Expected	The system must return to the message list of the same folder, and the deleted message must be in the trash box.
Outcome	
Notes	

Test 403	
Description	With the language set to "English", the testers must delete a message from the
	trash box.
Expected	The system must return to the message list of the trash box, and the deleted
	message must not be present.
Outcome	
Notes	

Test 404	
Description	With the language set to "Spanish", the testers must delete a message from any folder but the trash box.
Expected	The system must return to the message list of the same folder, and the deleted message must be in the trash box.
Outcome	
Notes	

Test 405	
Description	With the language set to "Spanish", the testers must delete a message from the
	trash box.
Expected	The system must return to the message list of the trash box, and the deleted
	message must not be present.
Outcome	
Notes	

Use case 053: Move a message.

Description

An actor who is authenticated wants to move a message from one folder to another.

Access

(Logged in as any actor, please refer to the test related to logging in for more information) Main menu>Folders and messaging>See messages>Move to another folder (Mover a otra carpeta).

Test 406			
Description	With the language set to "English", the testers must check that every important field is present.		
Expected	The system must return the form with the field containing the different folders that the logged in actor has. Move message Out box Save Cancel		
Outcome			
Notes			

Test 407			
Description	With the language set to "English", the testers must press the "Cancel" button.		
Expected	The system must return to the message list.		
Outcome			
Notes			

Test 408	
Description	With the language set to "English", the testers must check that every correct value for the target folder is available.
Expected	The system must return every folder that the actor has, except for the origin folder.
Outcome	
Notes	

Test 409	
Description	With the language set to "English", the testers must choose any folder. Afterwards, the "Save" button must be pressed.
Expected	The system must return a list of messages, corresponding to the target folder, and it must contain the moved message. The message must not be present in the origin folder.
Outcome	
Notes	

Test 410			
Description	With the language set to "Spanish", the testers must check that every important field is present.		
Expected	The system must return the form with the field containing the different folders that the logged in actor has. Mover mensaje Out box Guardar Cancelar		
Outcome			
Notes			

Test 411		
Description	With the language set to "Spanish", the testers must press the "Cancelar" button.	
Expected	The system must return to the message list.	
Outcome		
Notes		

Test 412	
Description	With the language set to "Spanish", the testers must check that every correct value for the target folder is available.
