Bug in use case 006: Creating a new repair shop
Description

Creating or editing a repair shop is vulnerable to XSS scripting. The @SafeHtml annotation was removed

Results

The bug was detected

Bug in use case 006: Creating a new repair shop
Description

The controller has been changed so that when a mechanic saves a mechanic shop, he is redirected to the welcome page instead of the list of his repair shops.

Results

The bug was detected

Bug in use case 011: Reserving a service
Description

The button for reserving a service is still shown even if the user cannot reserve that service.

Results

The bug was detected

Bug in use case 016: Displaying and editing configurations.
Description

If the Admin tries to change the configurations, the system remains in the same page and no error message is shown.

Results

The bug was detected

Bug in use case 016: Displaying and editing configurations.

Description

If the input for changing the legal text is not valid, the system fails.

Results

The bug was detected

Bug in use case 019: Listing the flagged comments.

Description

The new comments are not flagged correctly.

Results

The bug was detected

Bug in use case 020: An actor who is authenticated as an admin must be able to create and edit the spam words.

Description

Creating or editing a spam word is vulnerable to XSS scripting.

Results

The bug was not detected

Bug in use case 021: An actor who is authenticated as an admin must be able to create and edit the id number patterns.

Description

When you click on the select box when showing the id number patterns list, there are no nationalities.

Results

The bug was not detected

Bug in use case 023: An actor who is authenticated must be able to write a report.

Description

The creator of a report when it is displayed is wrong. It shows the reported user twice.

The bug was not detected

Bug in use case 027: Create a sponsorship
Description

When you create a sponsorship providing an expired credit card, the system must show the following message: 'Credit card must not have expired', but the system creates it.

Results

The testers didn't report this bug

Bug in use case 029: Cancel a sponsorship
Description

When you cancel a sponsorship providing an expired credit card, the system must return the list of sponsorship created with the sponsorship cancelled, but the system doesn't cancel it.

Results

The testers reported this bug.

Bug in use case 031: Write and edit a review
Description

When you write or edit a review with contains spam words, the system doesn't flag it.

Results

The tester reported that the system doesn't show any sponsorship flagged but they didn't detect the reason.

Bug in use case 035: List created announcements.
Description

Trying to cancel an announcement does nothing.

Results

The bug was detected.

Bug in use case 040: Find announcements.

Description

Sorting the finder results causes an HTTP error.

Results

The bug was detected.

Bug in use case 041: Create or edit an announcement.

Description

Pressing the "Cancel" button redirects to the list of available announcements, instead of the list of created ones.

Results

The bug was not detected.

Bug in use case 048: An actor who is authenticated must be able to manage his or her folder, except for the system folders.

Description

Trying to rename a folder has no effect.

Results

The bug was detected.

Bug in use case 049: List messages.

Description

Marking a message as spam does not automatically mark it as read.

Results

The bug was not detected.
